

Transparency Film (Duratran)

Using Premium Backlit Film / 7 mil from Kodak along with Kodak GX or Gi inks, the bright, vivid colors printed on the transparency media are intensified when these graphics are placed in a lightbox

Outdoor Transparency Film (Outdoor Duratran)

Using Kodak poly poster matte film and is printing with Kodak GO+ inks, the bright, vivid colors printed on the transparency media are intensified when these graphics are placed in an outdoor lightbox

Pro Print (Poster)

These photographic-quality, professional poster prints are great for using in a print frame. The colors produced on the Kodak Premium Photographic Satin Paper / 180g or the Kodak Premium Photographic Glossy Paper / 200g medias make the images appear life-like.

Vinyl Banners

Using Big Systems Econo-banner material, banners can either be hung indoors or outside. Adding grommets to the banner gives it a great finished look.

Tear Resistant Polyfilm

This tear resistant poster media printed w/ Kodak GO+ inks, offers excellent durability and image quality. Works great w/ our Ano Gotcha system.

Invisaview

Perforated vinyl w/ a 65/35 perforation pattern, meaning 65% of the film is retained and 35% is removed. This pattern, along w/ the use of Kodak GO+ inks, allows the customer to create stunning graphics, utilize glass surfaces, and still retain visibility through the window to the outside.
